Across

4. This fish uses the Peconic River to move from saltwater to freshwater in the spring.
5. These shellfish have hundreds of beautiful blue eyes on the edge of their shell.
6. This crab is known for having one large claw.
8. Birds and other marine life feed on the eggs of this ancient critter.
9. This fish is flat, lives on the bottom of the sea floor and has both eyes on one side of it's face.
11. This marine mammal can be seen lounging on rocks in Montauk most often during winter.

Down

1. You may see an area on the beach blocked off to protect this bird's nests.
2. This crab has a soft body and will use snail shells to protect itself.
3. This 'fish' isn't actually a fish at all and if you touch it you might get stung.
5. This soft-bodied animal has tentacles but is smaller than an octopus.
7. This shellfish will use it's 'foot' to bury under the sand.
10. You might find this bird perched high up in nests on specially made platforms.
